

**Project Design Phase-II**  
**Solution Requirements (Functional & Non-functional)**

|               |  |
|---------------|--|
| Date          | 03 October 2022  |
| Team ID       | <b>PNT2022TMID43379</b>  |
| Project Name  | <b>Real-Time River Water Quality Monitoring and Control System</b> |
| Maximum Marks | 4 Marks  |

**Functional Requirements:**

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task)   |
|--------|-------------------------------|--|
| FR-1   | <b>User Registration</b>      | Registration through registered credentials<br>register confirmation e-mails   |
| FR-2   | <b>User Confirmation</b>      | Confirmation via Email<br>Confirmation via OTP/SMS   |
| FR-3   | <b>Log in to the System</b>   | Enter the OTP<br>Check the Credentials<br>Check the Access/Server  |
| FR-4   | <b>Manage the Modules</b>     | Manage the system Admins of user<br>Manage and Monitor Details of System User<br>Manage the User Roles<br>Manage the User Accessibility and User Permission<br>Manage User Details Privacy |
| FR-5   | <b>Check Process Details</b>  | Temperature Details<br>PH Details<br>Turbitidy Details<br>dissolved oxygen level in water<br>presence of chemical substances in water  |
| FR-6   | <b>Log out</b>                | Save the existing measurements<br>Exit   |

**Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description  |
|--------|----------------------------|--|
| NFR-1  | <b>Usability</b>           | Make Easier to Use ,More Efficiency to Use,Reduction of Errors While Using this Techniques   |
| NFR-2  | <b>Security</b>            | end by end encrypted protocol in Data Authentication, Sensitive data proctected personally identifiable information(PII) other information details of users and networks |

|       |                     |   |
|-------|---------------------|---|
| NFR-3 | <b>Reliability</b>  | <p>Provides the objective evidence necessary to make decisions on managing water quality today and in future also.</p> <p>This techniques make good communication between the user and the networks and it also achieves a better trade-off between costs and reliability</p> |
| NFR-4 | <b>Performance</b>  | <p>Implementing Monitoring River Water, by using sensing sensor to monitor the river water parameters making more useful for various environmental Usage.</p>   |
| NFR-5 | <b>Availability</b> | <p>PH Monitoring, Conductivity Analysis, CDOM (Dissolved Organic Matter), Measure of Carbonate and bicarbonate levels in water, this techniques made possible by linking information in water</p>   |
| NFR-6 | <b>Scalability</b>  | <p>Automatic Water Sampler, PH testing, Recording the water temperature, chlorophyll fluorescence analysis measuring the dissolved oxygen levels.</p>   |
